

INDIVIDUAL QUESTIONS – INTRODUCTION

CHAPTER CONTENTS.

Because the output is a structured network, we can apply a range of queries to explore the data. This gives us a library of **pre-existing approaches** to ask **practical questions** about the causal landscape described by the participants.

Ex

PAGES IN THIS CHAPTER

 **Individual views – How does the system work according to individual sources ?**

 **Summarising – How do the sources claim that the system works, in summary ?**

 **Vignettes – What is a typical source and what is their story ?**

 **What are the narratives behind a specific link ?**

 **Which factors and links were most frequently mentioned ?**

-  **Which factors and links are mentioned by the most sources ?**
-  **Main outcomes. Which factors are mentioned most often as outcomes ?**
-  **Main drivers. Which factors are mentioned most often as drivers ?**
-  **Splitting by groups. Are different groups involved in different ways ?**
-  **Comparing groups – What factors or links were mentioned more by some groups than others, in the same map ?**
-  **Identifying groups – Are there different subgroups within the data ?**
-  **What are the emerging or unexpected factors ?**
-  **Does the evidence support your theory of change ?**
-  **Assessing systems change**
-  **Sentiment – Which changes are perceived as most positive or negative ?**
-  **Focusing on specific factors. What influences and outcomes are connected to a specific factor ?**
-  **Looking downstream. What are the direct and indirect consequences of one or more factors ?**
-  **Looking upstream. What are the direct and indirect influences on one or more factors ?**
-  **Path tracing – How do one or more causes affect one or more effects, including indirect pathways ?**
-  **Source tracing – What are the consequences of one or more factors, looking only at stories told in their entirety by individual sources ?**
-  **Robustness – How robust is the evidence for that X influences Y ?**
-  **Counting and comparing influences**

 Properties of the causal map – Which factors are reported as being causally central or causally peripheral ?
 Properties of the causal map – What is the overall structure of the network ?
 Properties of the causal map – Are there leverage points ?
 Properties of the causal map – Are there feedback loops ?
 Combining questions
 Tribes. The most relevantly different subgroups in your data (by causal story)
 Showing group data as custom link labels on the map with optional significance test
 Names of tables and fields
 Hierarchical coding
